

Call for Post-Secondary Students Who Are Experienced Math Tutors: Join Our Discussion and get paid!

JUMP Math is a Canadian charity transforming how students from Kindergarten to Grade 8 learn math. Its evidence-based program is designed to build confidence, understanding, and success in all learners. Founded by Dr. John Mighton, an award-winning mathematician and educator, JUMP Math is grounded in the belief that everyone can excel in math with the right support and teaching methods.

We're launching a pilot to develop our own direct paid tutoring services for the public and are seeking post-secondary students from STEM or Education programs with experience in K-8 math tutoring to help shape this exciting new initiative.

What's Involved:

- Participate in a brief 60-90 minute virtual 1-on-1 discussion to share your insights and experiences.
- Discuss key topics like compensation, tutor training/support, and our program's structure and approach.
- Receive a \$100 Amazon gift card as a thank-you for your time and input.

Eligibility:

- Post-secondary students currently enrolled in a STEM or Education diploma or degree program with at least one year of paid or volunteer K-8 math tutoring experience.

Discussion Topics:

- Your tutoring experiences and challenges.
- Preferences for compensation and payment structures.
- Ideas on resources, training, and support for tutors.
- Building a strong, connected tutor community.

How to Participate:

We're looking for up to 10 tutors to participate in this opportunity. If interested, email Sruthi.Prabhakumar@jumpmath.org.

Selected participants will be scheduled for a virtual discussion to share valuable insights and help us create a robust and impactful tutoring program.

Thank you!
